

MARLEAUX „BC4“ 4-band active/passive

The heart of the Tiuz lies in a brand new electronics package. Two newly designed Marleaux pickups are matched to a new 4-band active preamp. Along with volume, balance and passive tone controls, the new preamp boasts bass, low mid, high mid and treble boost/cut knobs. On top of that, the mid frequencies themselves can be selected using trim pots on the preamp!

Design variations possible. January 2017.
